758 Niru® Knob-Top Runner® Anti-Fatigue/Anti-Slip Matting

Available Colors: Orange, Red, Black, Gray

Made from a 100% Nitrile rubber compound providing the highest degree of resistance to many industrial chemicals, greases, oils, and animal fats, Niru® Knob-Top Runner® is designed for safety and traction. Its low profile allows carts to roll over the mat with ease. Niru® Knob-Top Runner® is reversible further extending the service life of the mat making it the perfect product for industrial and food service applications where a continuous length of comfort and anti-slip matting is needed.

Test	Test Description	*Results
Compression Deflection	Test specimen is subjected to varying compression load levels and the resulting deflection was measured. The greater the deflection, the better the anti-fatigue properties. (Inches)	.506" (40 lbs/sq. inch)
Coefficient of Friction ASTM C1028-96	A neolite heel assembly with a predetermined load is pulled horizontally with a dynamometer to measure the force required to cause the assembly to slip.	.80
Abrasion Resistance ASTM D3884-01	Test specimen is subjected to the rubbing action of two abrading wheels under controlled conditions. Results measured in Weight loss (Grams)	9.19 Grams
Elongation ASTM D412	Test specimen is stretched at a specified rate until breaking point. The results are measured in weight needed to break, and % of size increase at breaking point.	144.4% (average of 5 specimens)
Hardness ASTM D2240-02	The hardness of a test sample is measured by means of a type A Shore Durometer. It measures the penetration of its specified indenter forced into the material under specified conditions	69

*All testing of NoTrax® floor matting has been performed by an independent testing laboratory.
